technology

Shadow Gap Joint

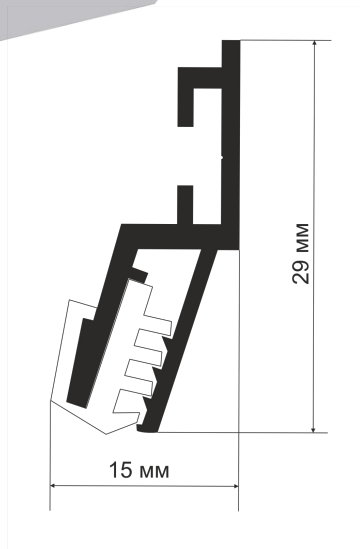

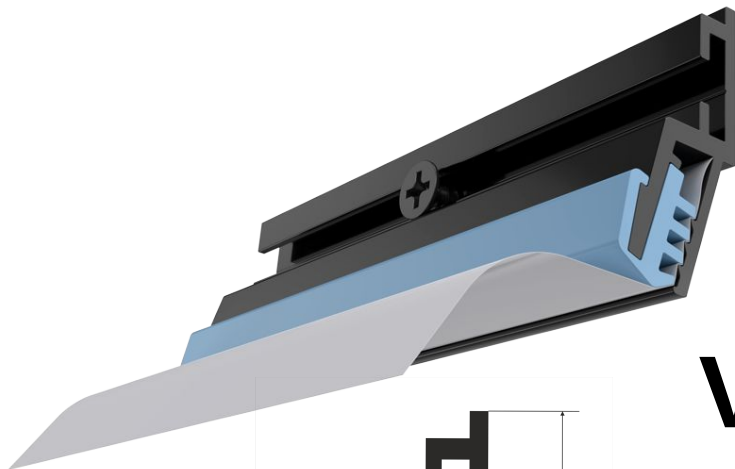

If you do not like framing with mouldings, a stylish solution is a shadow connection.

This technique creates the illusion of a suspended ceiling (surface), where the junction of the wall and ceiling is delineated by a thin, even shadow measuring 7 mm in width.

PROVEN RELIABILITY

Technology “Cavo-Basata”

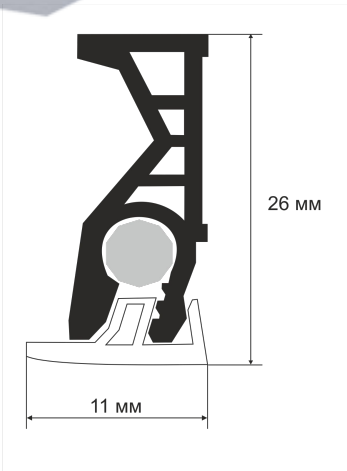

The CeruttiST system stands out from any other product on the market thanks to its patented lanyard technology.

This innovative fastening completely prevents fabrics from coming loose when stretched.
